

# Capabilities Overview

*Where Partnership Meets Performance*

# About Us

Riviera Energy is an Energy Industry consultancy providing **Project Consulting services, specialist technical workforce resources, and integrated full-package project solutions** to clients across the oil & gas, renewables, power generation, and marine energy sectors.

With over a decade of experience, Riviera Energy supports complex projects by delivering highly qualified engineering professionals and tailored consultancy services across the full project lifecycle.

Our capability spans **early-stage concept and design through execution and operational support, enabling clients to mobilise efficiently, manage risk, and achieve consistent project outcomes.**

Riviera Energy combines deep industry expertise with a flexible, solutions-driven approach, offering scalable resourcing models and technically robust support aligned to the evolving needs of the global energy market.

Established since 2014

# About Us

**Riviera Energy** is an engineering and asset integrity consultancy delivering high-confidence project outcomes across the full energy asset lifecycle. We **specialise in greenfield, brownfield, and late-life assets** where technical certainty, execution discipline, and informed decision-making are critical.

We support complex projects from concept through execution, restart, and operational readiness, combining strategic project consultancy, multidisciplinary engineering expertise, and deployment-ready technical teams. Our experience spans new developments, mothballed and preserved facilities, and long-idle hydrocarbon assets across the U.S., Middle East, and Australasia.

Riviera Energy's approach is grounded in a core principle: **asset condition cannot be assumed; "only field-verified inspection reveals true risk, cost, and restart viability"**. By validating reality on the ground, we help clients reduce uncertainty, protect capital, and execute with confidence.

Established since 2014

# Restart-Readiness Executive Snapshot

## Who We Are

Specialized engineering and asset integrity firm focused on Greenfield and brownfield projects worldwide.

- ✓ Deep expertise in mothballed, preserved, and long-idle hydrocarbon assets.
- ✓ Core focus on bringing complex assets back online safely and economically.

## Why It Matters

- ""True asset condition cannot be assumed - only field inspection reveals the actual restart viability."
- 🛡 Risk Reduction: Only field inspection confirms restart viability.
  - ↳ For Investors: De-risk capital allocation and validate schedules.
  - 👤 For Operators: Ensure regulatory compliance and safe startup.

## Relevant Credentials

- 🌐 Decades of restart experience across U.S., Middle East, & Australasia (BP, Shell, Caltex).
- ⚙️ Full-facility assessments for 80–300 kbpd refineries.
- 🔍 West Texas GTL Case: Disproved nitrogen-preservation claims; uncovered hidden failures.
- 🏛️ Gov't Advisory: Middle East refinery rehabilitation & modular replacement strategies.
- ✖️ 200+ major equipment packages inspected globally.

## Outcome We Deliver

Verified asset condition • Restart risk profile • Credible cost/schedule ranges

Decision Confidence  
**High**

Asset Clarity  
**100%**

# INITIAL ASSESSMENT PHASE

## 5-Step Execution Scope

1

### Field Condition Assessment

Multidisciplinary inspection of process units, utilities, rotating equipment, tank farms, logistics infrastructure, and power distribution.

2

### Documentation & Technical Verification

Review and reconciliation of PFDs, P&IDs, equipment lists, corrosion circuits, and historical inspection data records.

3

### Preservation & Metallurgy Review

Identification of degradation risks, corrosion exposure, metallurgy issues, and catalyst-related restart blockers.

4

### Regulatory & Environmental Gaps

Analysis of emissions compliance, sulfur limits, product specs, flare compliance, and global fuel quality standards.

5

### Restart Feasibility & Cost Model

Structured decision framework determining technical/economic viability, risk-ranked constraints, and CAPEX/OPEX drivers.

# Our Team

**Jason Antunovich**  
Managing Director

Jason brings more than 30 years of experience of a broad background across design, system analysis, commissioning, and construction, supported by extensive project and line management experience. He has worked on major international projects both on site and in senior corporate roles, collaborating with Tier 1 operators such as Shell, Exxon, and Woodside, and provides strong leadership in change management, people development, and high-performing team delivery that underpins Riviera Energy Company's execution and governance capability.

**Julianna Iris Tan**  
Managing Partner

Julianna brings more than 20 years of experience in the energy industry, specialising in upstream offshore installation and EPCI project management. She has worked on major international projects across Oil & Gas and Renewables, collaborating with leading operators and contractors such as TotalEnergies, TechnipFMC, and Saipem, and contributing to developments including Kaombo Norte, CORAL Sud, and the Yulin Wind Farm, strengthening Riviera Energy Company's execution-focused engineering capability.

**Aisyah Adam**  
Operations & People Lead

Aisyah brings an extensive background in logistics and education, with a strong focus on the welfare and development of our people. As Operations & People Lead, she manages team mobilisation and rotations. Aisyah places safety, health, and individual wellbeing at the centre of operations, ensuring each team member is fully supported before, during, and after mobilisation. Her people-first approach supports Riviera Energy's commitment to safe, compliant, and sustainable project delivery, where performance and well-being go hand in hand.

# Our Partners

# A Global Reach

# Integrated Solutions Across Project Lifecycle

## Commissioning & Operational Readiness

Defined technical capability aligned to specific project scopes, not individual resources. This solution combines technical capability with compliant, timely deployment across borders ensuring the right expertise is integrated, accountable, and effective from day one.

***From completion to confident operation***

## Strategic Project Consultancy

Strategic project consultancy rooted in proven technical expertise and real-world execution experience. Through a global network of partners and senior specialists operating across time zones, we enable cost-efficient decisions, rapid issue resolution, and continuous project momentum.

***Experience-led expertise supporting execution around the clock***

## Global Workforce & Mobility Solutions

Integrated delivery and compliant global mobilisation of specialist offshore capability for survey, ROV, inspection, and commissioning activities. Efficient, deployment-ready teams, reducing downtime, protecting schedule, and enabling safe, cost-efficient execution.

***Delivering globally capable, without disruption***

# What sets us apart

## Professional & Experienced

A team of experts in the field with more than 50 years of experience.

## Fast-track Service

Accelerated Response Time and Submission with Dedicated 24/7 Client Support

## Measurable Results Target

A client-focused approach delivering high-quality, value-driven proposals with the flexibility to ensure optimal outcomes and maximum value for every engagement.

## Trusted Talent Network with Proven Compliance Standards

A global talent database of ~100,000 + specialists, supported by rigorous screening processes and full compliance with local and international hiring regulations, ensuring quality, reliability, and risk-managed workforce delivery.

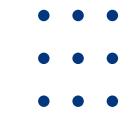

## 24/7 End-to-End Support

Continuous support throughout the full lifecycle, from onboarding and mobilisation through to rotation management and demobilisation.
